[1. Et: Electronics, Information and Communication Technologies](#)

Release Date: 03-08-2013Open Date: 05-13-2013Due Date: 06-13-2013Close Date: 06-13-2013

The NSF SBIR Program conceptualizes Electronics, Information and Communication Technologies in the form of a five-layer stack. Each layer of the stack builds upon the layer(s) below and supports the layer(s) above. At the foundation of this stack are devices. Devices (ED) are the building blocks for Components (EC) that are assembled into Systems (ES) built for Applications (IA) that are employed ...

[2. EA: Education Applications](#)

Release Date: 03-08-2013Open Date: 05-13-2013Due Date: 06-13-2013Close Date: 06-13-2013

The Education Application (EA) topic addresses the challenges of advancing STEM (science, technology, engineering, and mathematics) education for all American students, to nurture innovation, and to ensure the long-term economic prosperity of the Nation. The urgency of this task is underscored by the need to ensure that the United States continues to excel in science, technology, and inno ...

[3. NM: Nanotechnology, Advanced Materials, and Manufacturing](#)

Release Date: 03-08-2013Open Date: 05-13-2013Due Date: 06-13-2013Close Date: 06-13-2013

The Nanotechnology, Advanced Materials and Manufacturing (NM) topic addresses innovations and development of new materials, devices, machines, structures and manufacturing processes for the advancement of the competitive nature and state of the art for U.S. industry. NM includes materials and manufacturing technologies such as electronic materials and processes, high-temperature materials, structu ...

[4. BC: Biological and Chemical](#)

Release Date: 03-08-2013Open Date: 05-11-2013Due Date: 06-11-2013Close Date: 06-11-2013

The Biological and Chemical Technologies (BC) topic addresses innovation in the life sciences and chemical areas including Biological Technologies, Biomedical Technologies, Environmental Technologies, and Chemical Technologies. Biological Technologies includes the subtopic areas of research tools, bioinstrumentation, biosensors, computational biology and bioinformatics, synthetic biology and metab ...

[8. Accelerating Sustainability using Enabling Technologies \(ASET\)](#)

Release Date: 10-04-2012 Open Date: 01-06-2013 Due Date: 02-06-2013 Close Date: 02-06-2013

A sustainable world is one in which human needs are met equitably without harm to the environment, and without sacrificing the ability of future generations to meet their needs. Meeting this formidable challenge requires a substantial increase in our understanding of the integrated system of society, the natural world, and the alterations humans bring to Earth. Such understanding should inform th ...

[9. Enhancing the Bioeconomy using emerging Biological Technologies \(EBBT\)](#)

Release Date: 08-06-2012 Open Date: 10-20-2012 Due Date: 12-20-2012 Close Date: 12-20-2012

NSF seeks to help reach the nation's biological innovation goals, and the larger objective of growing the bioeconomy. The bioeconomy has emerged as a national priority because of its growth potential across many key industries and its societal benefits, which include transforming manufacturing processes, increasing agricultural productivity, advancing medicine, addressing energy needs, and meeting ...
